## SUMMARY

Software Engineer & ML practitioner - B.Tech CSE sophomore at Bennett University (CGPA 8.74) with production experience in backend systems, fraud detection, REST APIs, and cross-platform mobile engineering. IEEE BU Chairperson leading 100+ members with ₹1.48L+ in secured sponsorships. Builder of MARI - a fraud detection system trained on 284,807 transactions with sub-100ms real-time inference. Published author.

## EDUCATION

### Bennett University, Greater Noida

Aug 2024 – Aug 2028

B.Tech – Computer Science & Engineering | CGPA: 8.74 / 10.0

### Sunbeam School Varuna, Varanasi

2016 – 2023

Grade 10: 95% | Grade 12: 89% — PCM

## EXPERIENCE

### Software Developer Intern · BuildIt Service

Mar 2026 – Present

Gurugram, Haryana

- Developing lead generation automation pipelines and REST API integrations for client acquisition workflows at a digital agency.
- Building client-facing web applications with modern JS frameworks; contributing to backend architecture, deployment, and internal tooling.

### Application Developer (Flutter) · Raahi

Oct 2025 – Mar 2026

Noida, Uttar Pradesh

- Delivered a production cross-platform mobile app (iOS, Android, Web) with BLoC state management, secure auth, and SQLite persistence.
- Shipped 4+ sprint releases over 5 months; optimised widget rendering for 60fps performance across all device targets.

### Chairperson · IEEE Student Branch, Bennett University

Sep 2025 – Present

Noida, Uttar Pradesh

- Lead 100+ member branch; secured ₹1.48L+ in sponsorships; organised Global AI Summit 2.0 with 3,000–4,000+ total attendees.
- Directed Triverse 3.0 (600+ participants)

## PROJECTS

### MARI - Risk-Aware Fraud Decision System

Python · FastAPI · XGBoost · Docker · Railway

[mari-alpha.vercel.app](#)

- Engineered a 3-layer fraud detection system trained on 284,807 transactions — 5-member calibrated XGBoost ensemble + Isolation Forest; 5 decision states; sub-100ms real-time REST API inference.
- Designed cost-optimised routing policy with asymmetric loss functions, consequence-weighted thresholding, and full explainability output per transaction.

### Flutter OTT Streaming App

Flutter · Dart · SQLite · BLoC

[github.com/devantaris/flutter-ott-app](#)

- Cross-platform OTT app (iOS, Android, Web) with local auth, content catalog, rental/purchase flow, and cinematic UI using BLoC state management.

### Biome - Focus Forest

React · TypeScript · Firebase · Electron

[biome-focusforest.web.app](#)

- Cross-platform world-building productivity app (PWA + Desktop) with focus timer, daily planner, real-time leaderboards, and offline service workers.

### SkillSync Platform

React · Node.js · Express · Supabase · Razorpay

[github.com/devantaris/SkillSync](#)

- Full-stack peer-to-peer skill economy platform with AI-powered course validator, Razorpay payment integration, and Supabase PostgreSQL + RLS backend.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, Dart, C++, Java, SQL

**Frameworks:** FastAPI, Next.js, React, Node.js, Flutter, Tailwind CSS

**ML / Data:** XGBoost, Scikit-learn, Isolation Forest, Pandas, NumPy, Matplotlib

**Databases:** PostgreSQL, Redis, SQLite

**DevOps / Tools:** Docker, Git, GitHub Actions, Railway, Vercel

## CERTIFICATIONS & PUBLICATIONS

### IBM Machine Learning Professional Certificate

Feb 2026

IBM | Credential ID: TYJU31W22CSJ

### Ultimate Guide to FastAPI & Backend Development Specialization

Mar 2026

Packt / Coursera | REST APIs · PostgreSQL · OAuth2/JWT · Docker · AWS

**Simply Universe** — Co-authored book (Yash Sharma, Ishan Verma & Devansh Kumar). Published by Pothi Publications.
